Newfoundland	1.00	Labrador	1.00

are now taking a greater percentage of the oil in certain districts but the success of this co-operative movement depends upon a broad view being taken of the entire situation in the oil industry. Much more oil is still being offered in the field as a whole than the purchasing companies are able to take. Therefore, the condition of waste as defined by the laws of economics and the status of Oklahoma still exists. The total production of the field still exceeds the pipe line capacity for shipment and independent refinery requirements. Whether such is the case and with the pipe line extensions not yet completed to some producing areas, it is the obvious duty of the oil producer to hold back his drilling activities in order to prevent the bringing of oil to the surface, which neither the purchasers nor the public demand or can use at this time.

The committee estimates that the total daily gross production of crude oil in the midcontinent field on December 1, 1920, was approximately 725,000 barrels a day; that as a result of the curtailment order in December the production had decreased to between 650,000 and 700,000 barrels a day on January 1, 1921, and that the daily production was on March 1, 1921, in the neighborhood of 625,000 barrels per day. With the independent refiners taking 250,000 barrels of crude daily, there would remain a balance of 400,000 barrels per day, which exceeds pipe line capacity by 30,000 to 40,000 barrels per day. It should therefore be apparent to all that this co-operative movement must continue until the demand increases or the production decreases to the point where the equilibrium between supply and demand is re-established. The operators have already made many sacrifices and have entered into this movement with a great patriotic spirit so that it would be regrettable if through false impressions or rumors they should now lose the benefit of what has already been done by a premature abandonment of the plan or the bringing about of a sudden and unnecessary increase in the production. This might occur should wells now on top of the sand be drilled in or should general drilling be resumed.

As soon as it clearly appears that the situation is clearing up and that marketing facilities are or are about to become adequate to handle the production of the midcontinent field the committee will promptly and joyfully notify all concerned and disband. In the meantime, the committee very earnestly desires to express its appreciation of the splendid spirit of helpfulness displayed by all classes of operators.

COMMITTEE ON CONSERVATION AND CONCILIATION.
By BURT H. COLLINS, Chairman.
HARRY H. SMITH, Secretary.

Good Showing in Well Near Cushing
The Cosden Oil company No. 2 Yont, located in the southeast corner of the northeast of the northeast of 11-11-11 is dry and abandoned at 2,508 feet. The well is about three-fourths of a mile south of the closest Layton sand well, but is an offset to wells in the Cleveland and Wheeler sands. The Cleveland sand is found about 2,500 feet in this district and the Wheeler sand is found about 3,000 feet.

Good Well in Deane Pool
It is reported that the No. 26 Holmes of the Kingwood Oil company, located in the center of the south line of the northeast of 16-11-11, is making an actual production of 650 barrels. The sand in this well was found from 2,629 to 2,640 feet.

Around Henryetta
F. C. Davis has abandoned his No. 2 Robinson, located in the northeast corner of the northeast of 1-11-11 at a total depth of 1,600 feet.

The Pail Oil company's No. 1 Hopwood, located in the southwest corner of the northeast of southwest of 11-11-11 is dry and abandoned at 2,508 feet.

The Indian Petroleum company have a 20-barrel well in their No. 5 Carter located in the southwest corner of the northeast of northwest of 12-11-11. Sand was found from 1,206 to 1,230 feet, and the well was drilled to the total depth of 1,670 feet.

The New York Oil company has a rig on the ground for No. 2 Jefferson located in the northeast corner of the northeast of southwest of 16-11-11. This is a twin location.

The No. 1 Barnett of the Oklahoma Central Oil company located in the southeast corner of the northeast of southwest of 11-11-11 had a 1,000,000 gas show at 2,038 feet, and is now drilling at 2,250 feet.

The Kansas Gulf Oil corporation No. 10 Jackson located in the center of the east line of the northwest of the northwest of 6-11-12 has been drilled deeper and abandoned at 2,695 feet. The same company has also abandoned its No. 12 Jefferson located in the northeast corner of the southwest of the southwest of 2-11-11, at a total depth of 2,340 feet.

The Gladys Belle Oil company has abandoned its No. 1 Burgess located in the southwest corner of the southwest of southwest of 2-11-11, at a total depth of 2,340 feet.

For Sale—New and secondhand pipe, gasoline plants and equipment; one 25 bar drilling machine. Phone Osage 7109. P. O. Box 1987, Tulsa, Okla.—Advt.

Wanted—Offset or close in shallow acreage to drill. Must be good stuff. Send plat and all information with first letter or no attention paid to proposition. Address Box 692-D, care World.—Advt.

Oil producer owning close-in properties wishes to get in touch with party who can raise money for drilling. Address Box 749-D, care World.—Advt.

Wanted to buy settled production at reasonable prices direct from owner. P. O. Box 283, Tulsa, Okla.—Advt.

For Sale—Casing and line pipe for immediate shipment out of stock in any quantity. Line pipe from 2 in. to 8 in. inclusive. Casing from 4 in. to 20 in. inclusive. Try us. We sell for less. Phone Osage 4760-4356. L. D. 40, Southview Pipe & Supply Co., 619 East First St., Tulsa, Okla.—Advt.

For your depletion and tax problems, accounting and systematizing call Carl L. Rice, C. P. A. 517 Kennedy Bldg. Phone Cedar 297.—Advt.

west of 12-12-12 at a total depth of 2,298 feet.
The Transcontinental Oil company has a hole full of water in its No. 2 Knowles located in the center of the east line of the southeast of the southeast of 14-12-12 in sand from 2,453 to 2,477 feet, and is now shut down.

J. W. Moore's No. 3 Kanard located in the center of the north line of the northeast of the northeast of 17-12-12 is a 10-barrel well in sand from 1,512 to 1,530 feet.
W. C. Newman has a 200-barrel show in his No. 2 Ewing located in the northeast corner of the southwest of the southwest of 22-12-12. Sand was found from 2,255 to 2,286 feet.

R. H. Black has a 6,000,000 feet gas well in sand from 2,710 to 2,718 feet in his No. 3 Holmes located in the southeast corner of the southwest of 8-12-12. It is reported this well has 1,000 pounds rock pressure.

The Cosmes Oil company's No. 1 Roberts located in the northwest corner of the southwest of 22-15-11 is a 22,000,000 feet gas well in sand from 2,007 to 2,532 feet.
The Lyons Petroleum company has abandoned its No. 3 Grayson in the center of the east line of the southwest of the southeast of the southwest of 4-12-12. No hole made and locations abandoned.

Kimbley's No. 6 Kanard located in the center of the south line of the north half of the southwest of 21-12-12 has a 4,000,000 gas show in sand topped at 2,455 feet.

The Iron Mountain Oil company has a hole full of water at 3,055 feet in its No. 6 Casey in the southwest corner of the northwest of the southwest of 30-12-12.

Development in Duncan Field
The Cosden Oil company No. 1 well located in the northwest corner of 15-13-SW, which had a good show of oil in sand from 2,128 to 2,145 feet, has never been able to shut the water off, which is coming in from above the oil sand. Every effort is being made to complete the well as a producer. However, it looks as though it may have to be abandoned due to bad condition of the casing seat. Conservative oil men have estimated the well as showing for between 75 and 100 barrels.

The No. 1 Bonner bobbins and others, which is located in the southwest corner of the northeast of the northeast of 3-12-SW, is reported to have been drilled 13 feet into the sand topped at 2,302 feet, and to have a very small showing of oil with considerable salt water. From latest reports, it is said the well looks like a failure.
